Berks Homes is the name and cozy is our game. Usually when people say cozy, they are trying to compensate for a small space. Not us. Every home we build is meticulously designed with a generously open floor plan. Every square inch is functional, yet each room has that cozy “I’m home” feeling. This home is no different. From the outside in, this 4BD/2.5BA beauty dresses to impress. The front porch and private backyard provide plenty of outdoor space for relaxing or entertaining. Speaking of open space, there’s a ton inside too. The 2400+ sqft floor plan feels like an indoor breath of fresh air. It’s got an island and quartz countertops in the kitchen of your dreams, shiny new Moen appliances throughout the whole place, all the standard rooms plus a breakfast nook and flex room. Still need more? We got it. This home has 4 bedrooms and more closet space than you’ll know what to do with. Let’s keep going ... you’ll also have a 2-car garage an 1,000 sqft to play with in the basemen
